Federal Committee on
Statistical Methodology

AI in Federal Government Uses, Potential Applications, and Issues

Tuesday, Oct 31, 2023 | 3 pm - 4:30 pm ET

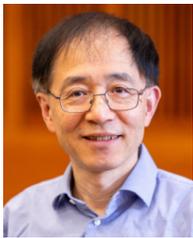

Virtual Zoom Webinar. Free Registration.

OVERVIEW

The National Institute of Statistical Sciences (NISS) and the Federal Committee on Statistical Methodology (FCSM) are collaborating to present the **NISS/FCSM Webinar Series on AI in Federal Government: Uses, Potential Applications, and Issues**. Federal practitioners and managers will benefit from behind-the-scenes information on uses of AI in federal agencies and from insights on how agencies meet organizational, managerial, and ethical challenges in harnessing the power of AI. Participation by researchers and managers in the webinars can help streamline current efforts to adopt AI and inspire new endeavors. The NISS/FCSM webinar provides unique opportunities not easily available through other forums or venues. Federal staff with all levels of AI expertise, and supervisors of researchers, will benefit from learning how AI is used now, how it might be used in the future, and how the issues and challenges it poses are being met by federal agencies. Opening remarks will be presented by the incoming NISS Director David S. Matteson.
